Information Disclosure Statement

2. The information disclosure statement filed 2-28-07 fails to comply with 37 CFR 1.98(a)(2), which requires a legible copy of each cited foreign patent document; each non-patent literature publication or that portion which caused it to be listed; and all other information or that portion which caused it to be listed. It has been placed in the application file, but the information referred to therein has not been considered.

Claim Rejections - 35 USC § 102

3 The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1 and 4-7 is rejected under 35 U.S.C. 102(b) as being anticipated by Laid Open Patent Publication No. Hei 6-219113.

Regarding claims 1 and 4-7 Laid Open Patent Publication No. Hei 6-219113 teaches a transmitting unit 12 detecting a state information of a tire 2 of a vehicle and outputting its detection signal to an outside as electromagnetic waves 13 17; and a receiving unit 14 receiving the state information of the tire from the transmitting unit 12 as the electromagnetic waves 13 17 near an end portion of an axle of the vehicle or inside a tire house 2; wherein an antenna of the receiving unit 14 is composed of a wire 5 (fig 1) of a predetermined length positioned inside a cylindrical space having a rotation locus of the transmitting unit 14 as an outer diameter thereof and having the axle as a center axis when the tire

rotates, the wire 5 being made integral with a wire harness that is connected to the receiving unit 14 (fig 1).

Allowable Subject Matter

3. Claims 2-3 are allowed.

The following is a statement of reasons for the indication of allowable subject matter: The cited prior art does not disclose nor suggest an output of the state information of the tire being overlapped with an output of the vehicle wheel speed sensor so that both the outputs are outputted by a common line.
